

# Hygeolis

**The professional anti-  
odour air purifier for  
your small spaces**

natéosanté

NatéoSanté, a specialist in indoor air quality, has been working with businesses since 2009. Committed to an eco-design and local production approach, NatéoSanté works every day to give everyone the ability to control the air they breathe. The company works in a variety of business environments and meets the most demanding specifications.

# An anti-odour air purifier for small spaces

The control of undesirable odours is a major challenge for many professionals. They have a direct impact on customer and staff comfort as well as on establishment image. Hygeolis is a real alternative to perfume diffusers, as it does not mask odours but destroys them by purifying the air, without any danger to health.

**Sanitary facilities**

**Changing rooms**

**Camper-vans & commercial vehicles**

**Mobile homes**

**Boat cabins**

**Hotel rooms**

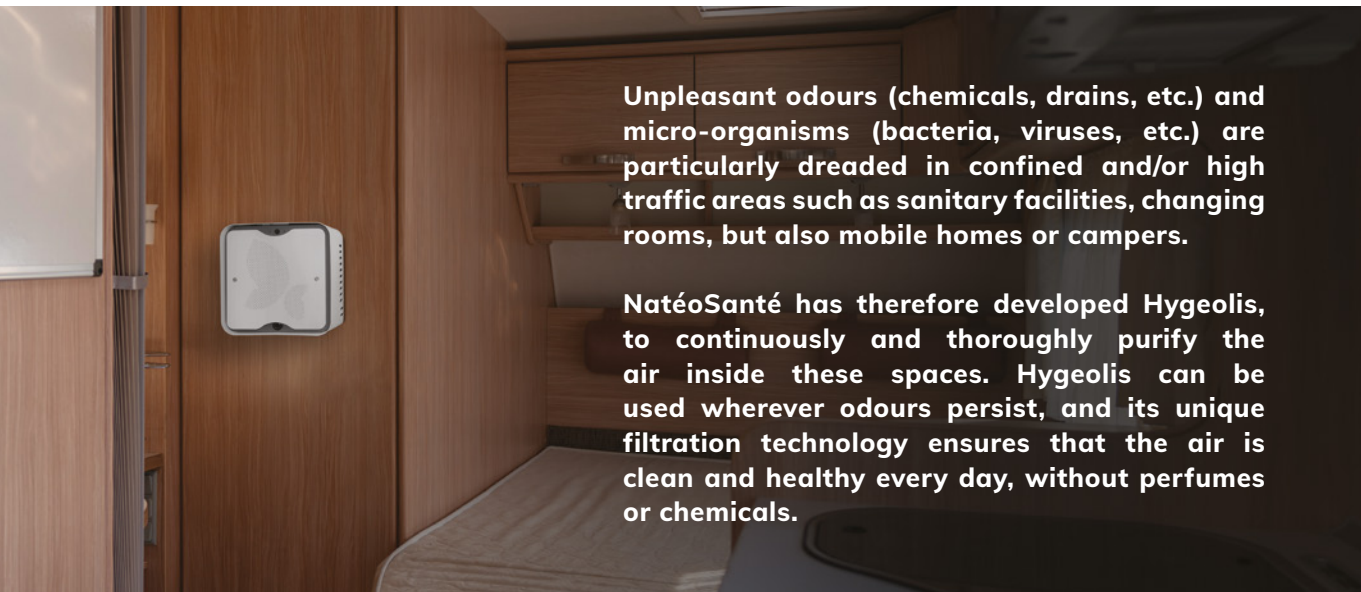

**Prefabricated units & technical rooms**

**Other confined spaces open to the public**

# Hygeolis destroys odours and purifies the air without perfumes or chemicals

Unpleasant odours (chemicals, drains, etc.) and micro-organisms (bacteria, viruses, etc.) are particularly dreaded in confined and/or high traffic areas such as sanitary facilities, changing rooms, but also mobile homes or campers.

NatéoSanté has therefore developed Hygeolis, to continuously and thoroughly purify the air inside these spaces. Hygeolis can be used wherever odours persist, and its unique filtration technology ensures that the air is clean and healthy every day, without perfumes or chemicals.

## Effective

- Continuous operation
- Destroys odours thanks to its unique filtration technology
- Three fan speeds

## Easy to use

- Plug & Play: plugs into a simple mains socket
- Available in 220V and 12V with cigarette lighter socket

## Made in France

- Designed, manufactured and assembled in France
- Three year warranty

## Eco-friendly

- Purifies the air without perfumes or chemicals

## Economical

- Long-lasting consumables
- Low power consumption (3W at low speed)

## Discreet

- Compact
- Quiet
- Customisable design (dependent on quantity)

## Mobile

- Lightweight and easily transportable
- Free-standing or wall-mountable

## Remote control

- Remotely controllable

# High - performance filtration for exceptional results

Hygeolis draws in stale air through the front and releases healthy air at 270° for optimum efficiency, whether free-standing or wall-mounted.

## Does not mask odours, but destroys them

Tobacco  
(including cigars)

Kitchen

Toilets/Drains

Musty/Mouldy  
smells

Body Odours

Animals

## A unique, controlled active oxygen technology

This exclusive technology (can be activated/deactivated) generates active oxygen, a natural detergent, in a controlled manner by offering two treatment modes:

- Mode 1 offers continuous air treatment with a low, steady emission of active oxygen.
- Mode 2, Clean Booster, removes airborne micro-organisms (viruses, bacteria, etc.) and unwanted odours that may be embedded in textiles or carpets, in just 30 minutes. This intensive treatment generates a higher amount of active oxygen, allowing for optimal efficiency when the room is cleared.

MODE  
CLEAN  
BOOSTER  
30 MIN

Treated area	Recommended area: 30 m <sup>2</sup> Maximum area: 45 m <sup>2</sup>
--------------	--

## FEATURES

Dimensions h. x l. x d. (cm)	23 x 23 x 19
Weight: including filters (kg)	4.2
Min / max power input (W)	3 - 12
Ventilation speeds:	3
Max airflow (m <sup>3</sup> / hour)	150
Noise level min / max (dB)	35 -52
Secure wall mounting	Included
Power supply	220V or 12V / 50 – 60Hz
Protection class	IP23

## FILTRATION AND TREATMENT SYSTEM

Filter blocks		Removable bactericidal, acaricidal and virucidal pre-filter ISO 18184 and NF G39-011-certified
		Very High Density activated carbon filter
		EN 1822-certified HEPA H13 medical-grade filter (optional)
Activatable active oxygen technology		<ul style="list-style-type: none"><li>Mode 1: Continuous air treatment</li><li>Mode 2: Intensive air treatment (Clean Booster 30 min)</li></ul>

## TECHNOLOGY

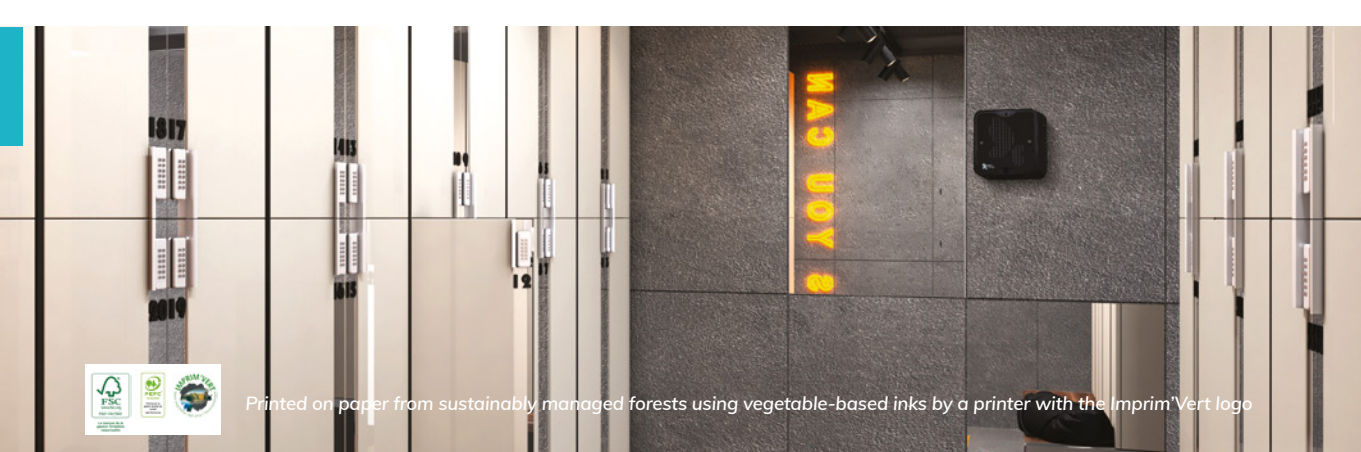

Remote control	Yes
Filter wear indicator	Yes
"ON/OFF/Standby" indicator	Yes

## OPTIONS

Customisation (dependent on quantity)	<ul style="list-style-type: none"><li>Choice of your Hygeolis colour</li><li>Customisation with your printed logo</li></ul>
---------------------------------------	---

## REPLACEMENT KIT

Filter unit made in France (weight: 0.4 kg)
---

Printed on paper from sustainably managed forests using vegetable-based inks by a printer with the Imprim'Vert logo
