BECAUSE YOUR VOICEPRINT IS UNIQUE,  
**SPEAK TO AUTHENTICATE YOURSELF IN LESS THAN 5 SECONDS!**

**100%** of calls are authenticated

**10** seconds to create your Voiceprint

Integrated into **Elo!**

# Voice biometric authentication solution

designed for the retail sector, administrations, companies and for health institutions.

## VOICE BIOMETRICS: FRICTIONLESS, SECURE AND AFFORDABLE!

This technology has several advantages over traditional control techniques such as access cards or access codes.

- ✓ Voice is the most natural and universal mode of communication.
- ✓ A contactless technology.
- ✓ The authentication is passive. It means there is no active role to be played by the elocutor to be authenticated.
- ✓ Authentication allows a smooth and frictionless customer journey.
- ✓ Smartphones and voice assistants are all potential sensors, hence making the solution very competitive.
