Project manager: ATAUB Architectes

Completion: Delivered September 2022

Usable area: 2,936 m²

outdoor area 2,199 m²

Cost excl. VAT: €6,327,410

Mission: Base + Qties + SIGN + OPC

BEPOS Effinergie 2017 building with E+C- level E3C1 and RT 2012, thanks to the presence of a heating network and the production of renewable energy (photovoltaic panels), Bbiomax - 20%. Use of bio-sourced materials with preference of local origin and the least processed possible. Use of photovoltaic panels for school group power and for nearby municipal swimming pool power.

Detailed ORIGAMI concept to design the project. Possibility of multiplication of dimensions, perspectives, from a limited space. It is a way of inserting the infinite into the finite and in this sense it is revealing.
